TRANSFORMING FOOD PACKAGING. **FOR GOOD.**

At Plus Pack, we want to lead the food packaging industry forward – by supporting the transition from linear towards more circular packaging.

Since 1914, our dedication has been fueled by our founding motto: ‘The drive to make a difference’. Four generations later, our drive is both stronger and more important than ever before.

We know that food packaging plays a defining role in building a more sustainable tomorrow. By continuously developing and providing truly circular food packaging, we aspire to enable our customers to protect and make food stand out, using ever less of our planet’s resources.

For people. For planet. For profit. For good.

CHOOSE
PLASTICS
DESIGNED TO
BE RECYCLED.
**FOR
GOOD.**

DESIGNED
to be recycled

TRANSFORMING
FOOD PACKAGING
FOR GOOD

Why use plastic food packaging?

PLASTICS IS A VALUABLE MATERIAL. IT SHOULD BE SORTED AND RECYCLED INTO NEW PRODUCTS

BECAUSE IT IS FIT FOR FUTURE

- PP and PET is mono-material and designed for recycling
- rPET holds on average 85% recycled content
- Choose clear plastics because it is easier to recycle
- Plastic is easy to recycle for the end-user

BECAUSE IT IS FIT FOR PURPOSE

- PP is ideal for fresh ready meals that are to be heated in the tray
- PET is ideal for fresh foods like salad, spreads, sandwiches etc
- Choose clear plastics because it is easy-to-recycle
- Plastic is easy to recycle for the end-user

THREE PRINCIPLES BEHIND RECYCLABLE PLASTIC FOOD PACKAGING:

BISTRO™ COLD

Bistro™ Cold trays are made from recyclable rPET, which is a material that consists of minimum 85% recycled material and is easy-to-recycle. In addition to supporting a circular economy, the clear Bistro™ Cold trays have leak-proof closure that prevents spillage and ensures freshness. The Bistro™ Cold trays are ideal for salads and other cold, ready-to-eat meals.

FIT FOR FUTURE:

- Mono-material
- Easy-to-recycle
- Clear material for easy sorting and recycling
- Holds minimum 85% recycled material

FIT FOR PURPOSE:

- "I am designed to be recycled" communicated in the bottom of tray
- Clear rPET lids provide leak-proof closure to prevent spillage
- Heat-sealing possible for longer shelf life
- Reverse handles for convenient handling
- Temperature range: -40°C to 70°C

MONO
material

TRANSFORMING
FOOD PACKAGING
FOR GOOD

BISTRO™ COLD

These clear trays are made from rPET – a mono-material that consists of minimum 85% recycled content and is easy to recycle. The trays come with clear rPET lids that provide leak-proof closure to prevent spillage.

ITEM NUMBER	ITEM DESCRIPTION	ML	LENGTH	WIDTH	HEIGHT	COLOR	PCS/ BAG	PCS/ CRT	PCS/ PALLET	LID (MATERIAL)

BISTRO™ WARM PP CLEAR

This range of microwaveable trays and lids is made of clear PP mono-material. PP Clear is a strong material enabling trays and lids to be washed and re-used by the end-user. The products are dishwasher safe at 65°C for 30 passages according to an adapted method by NF EN 12875-1:2005-11 standard. The trays are designed to be recycled, and they are reduced in weight compared to existing PP Chalk trays.

Two lid types are available; with or without venting, so you can choose the option that suits the situation. The venting enables air to leave the tray while heating in the microwave oven and you do not have to remove the lid beforehand. The need for venting typically depends on the situation – whether the consumer picks the meal up in the supermarket and heat it up at home or if the consumer picks the meal up in a restaurant and eat it right away at home.

FIT FOR FUTURE:

- Mono-material
- Designed to be recycled, thereby supporting a circular economy
- Easy-to-recycle
- Reduced weight compared to PP Chalk trays
- Reclosable lid reduces food waste
- Can be washed in dishwasher at 65°C for re-use

FIT FOR PURPOSE:

- Clear lids with anti-fog feature
- Lids with or without venting
- Leak-proof closure to prevent spillage
- Pull tabs for easy opening
- Heat-sealing possible for longer shelf life
- Can be customized with logo on lid and tray
- Temperature range: -40°C to 121°C

EASY
to recycle

TRANSFORMING
FOOD PACKAGING
FOR GOOD

BISTRO™ WARM PP CLEAR

This range of microwaveable trays and lids is made of clear and sustainable PP mono-material. The material is designed for recycling, thereby supporting a circular economy. Besides being recyclable, the range is dishwasher safe and can be reused after use. The lids also fit Bistro Warm PP Black.

BISTRO™ WARM PP BLACK

Bistro™ Warm PP is also available in PP Black material and it is also ideal for meals that are to be heated in the microwave.

PP Black is a strong material enabling trays and lids to be washed and re-used by the end user. The PP Black trays are though reduced in weight compared to existing PP Chalk trays.

Two lid types are available with or without venting, so you can choose the option that suits the situation. The venting enables air to leave the tray while heating in the microwave oven and you do not have to remove the lid beforehand.

The Bistro™ Warm PP Black range is an alternative to the Bistro™ Warm PP Clear range and it is ideal for ready-to-heat meals such as pasta, rice and stew dishes.

FIT FOR FUTURE:

- Mono-material
- Reduced weight compared to PP Chalk trays
- Recloseable lid reduces food waste

FIT FOR PURPOSE:

- High clear lids with anti-fog feature
- Lids with or without venting
- Leak-proof closure to prevent spillage
- Pull tabs for easy opening
- Heat-sealing possible for longer shelf life
- Can be customized with logo on lid and tray
- Temperature range: -40 °C to 121 °C

DELIWAVE™

This range of round trays is ideal for single-portion or snack-size meals. With the SafeSnack feature a spork can be placed hygienically in the bottom of the tray. The trays come in rPET or DPET. rPET consists of minimum 85% recycled content, whereas DPET has lower CO₂ emissions during production. The DeliWave™ trays are ideal for cold meals such as salads, tapas, sliced fruit and desserts.

FIT FOR FUTURE:

- Mono-material
- Easy-to-recycle
- RPET versions – minimum 85% recycled material
- DPET versions – reduced CO₂ emissions during production
- Clear material for easy sorting and recycling

FIT FOR PURPOSE:

- Trays with same top-out – same lid fits several trays
- Heat-sealing possible for longer shelf life
- Convenient – SafeSnack-feature for hygienic on-the-go consumption
- Temperature range: -40°C to 70°C

EASY
to recycle

FOOD PACKAGING
FOR GOOD

ECLIPSE™

These square trays made from rPET are designed with inverted corners for extra stability. In addition to minimum 85% recycled content, the trays are easy to recycle. The square design means less CO₂ emissions due to optimal material and space usage.

SHELFMASTER™ (1)

The range is available in a great variety of sizes and designed with 1 or 2 compartments. It fits a wide variety of food products such as small shrimps, tapas selections or larger salads. The range is easy to store and transport as the lids are designed to ensure safe, strong and high-impact stacking.

SHELFMASTER™ PRONTO

To add more convenience to the ShelfMaster™ line, the Pronto version adds a spork to the tray. The spork can be clicked into the corner of the tray, thereby making it easier to eat on the go. The square trays are available in different sizes, and can be closed by heat-sealing and/or with a lid.

SHOWBOWL™

These clear, round trays in rPET provide optimal presentation of your food as well as being easy to recycle. Opening tabs on tray and lid increase convenience to the customer, making it easier to open and reclose the trays.

SQUAREPAC™

This range of clear trays is made from sustainable rPET that is easy to recycle. Available in six different sizes – all with the same look. Keeping left-overs fresh, the hinged and reclosable lids contribute to reducing food waste. In addition, the square design means less CO₂ emissions due to optimization of production and transport.

VISTOPAC™

VistoPac™ is a range of multi-purpose trays. It is available in clear or in black - both made of rPET. The clear trays are easy-to-recycle. Rib walls add strength to the trays while protecting the food. The crystal-clear dome lids can be closed with one hand for convenient filling. The snap-in feature of the lid provides secure closure.

VistoPac™ is ideal for antipasti, tapas and sushi.

FIT FOR FUTURE:

- Mono-material
- Clear trays are easy-to-recycle
- RPET versions – minimum 85% recycled material
- DPET versions – reduced CO₂ emissions during production

FIT FOR PURPOSE:

- One-handed closing for convenient filling
- Visible opening tabs for easy opening
- Snap-in lids for secure closure
- Crystal-clear dome lids in different heights
- Rib design adds strength and extra food-protection
- Temperature range: -40°C to 70°C

TRANSFORMING
FOOD PACKAGING
FOR GOOD

VISTOPAC™

VistoPac™ trays are available in clear or black, both made of rPET. The clear versions are easy-to-recycle. A robust rib design and snap-in lids offer optimal protection of the food. The crystal-clear dome lid can be closed with one hand for more convenience in the filling process, while the snap-in feature secures closure. Lids are available in different heights and can be combined with the different trays as needed.

ZEN™

The Zen™ products are available in different ranges – a range for sushi and a range (Selection Platter) for tapas, fruits or desserts. The platters all come in rPET and they offer optimal presentation opportunities, with clear slanted lids, and trays available in either clear or black colour, perfect for food like sushi or tapas.

ABBRAEVIATION:	EXPLANATION:
AF	The lid comes with anti-fog treatment to prevent fogging on the surface
BL	The color of the tray/container is black
BULK	The packaging is packed in bulk
CLBAG	The packaging is packed in clear bags instead of standard blue bags
CL	The packaging is clear/transparent
CMP	The packaging has compartments - either 2, 3, or more
BPA NIA	This means that bisphenol is Not Intentionally Added
DOME	Dome refers to a round high lid
FB	The color of the tray is fiber-color
FULL CURL	The aluminium container is designed with full curl
GN	Indicates that the containers has standard formats called Gastronorm. Either 1/4, 1/2, etc.
GR	The color of the tray/container is grey
GRE	The color of the tray/container is green
H25MM	H indicates the height of the packacging in mm
HANDLES	The packaging has handles
HEART, SHELL, etc.	The packaging has a special shape (e.g. heart-shaped or shell-shaped)
HINGED	The packaging has a hinged lid
INSERT	Refers to a packaging solution that can be used as an insert in another tray/container
LACQ	The aluminium container is lacquered
OVAL	The packaging is oval
PACK or PAC	A packing method - the retail pack has ie 100 units
PERFORATED / PERFOR / PERF	The aluminium packaging is perforated
PREF	The lid is preformed
RECT	The packaging is rectangular
RIDGE	The packaging is ridged in the bottom (works well on the grill)
ROUND	The packaging is round
SET	The item contains a number of sets consisting of an equal number of trays and lids
SMOKEY GR	The color of the tray is smokey grey
SNAP-IN	The lid is a snap-in lid
SQUARE	The packaging is square
VER.CURL	The aluminium container is designed with vertical curl
VENT	The lid comes with venting which enables air to leave the tray
US.PAL	Special pallet size 1200 x 1000 mm
Ø133	Ø indicates the diameter of the lid in mm

GLOSSARY:	EXPLANATION:	SOURCE:
Bio-based products/material	Products fabricated from alternative agriculture materials or forestry materials or both. They are not necessarily compostable or biodegradable.	ASTM D6866 / 2012
Carbon footprint	The overall amount of carbon dioxide (CO ₂) and other greenhouse gas (GHG) emissions (e.g. methane, laughing gas, etc.) [converted into CO ₂ -equivalents] associated with a product, along its life cycle (including supply-chain, use and end-of-life).	European Commission Platform on Life Cycle Thinking
Circular economy	A systems solution framework that tackles global challenges like climate change, biodiversity loss, waste, and pollution. It is based on three principles, driven by design: Eliminate waste and pollution, circulate products and materials (at their highest value) and regenerate nature.	The Ellen Macarthur Foundation
Environmental impact	Any change to the environment, whether adverse or beneficial, wholly or partially resulting from an organization's activities or products.	ISO 14021:2016
Life Cycle Assessment	Process of compilation and evaluation of the inputs, outputs and the potential environmental impacts of a product system throughout its life cycle.	European Commission Platform on Life Cycle Thinking
Mono-material	The packaging is made from a single type of material and should therefore be preferred whenever possible, as it is fully recyclable when sorted correctly.	The Danish Plastics Federation
Net zero CO ₂ (also carbon neutrality)	Net zero carbon dioxide (CO ₂) emissions are achieved when anthropogenic CO ₂ emissions are balanced globally by anthropogenic CO ₂ removals over a specified period. Net zero CO ₂ emissions are also referred to as carbon neutrality.	The Intergovernmental Panel on Climate Change
Renewable energy	Energy derived from resources that are not depleted on timescales relevant to the economy, i.e. not geological timescales.	The Ellen Macarthur Foundation
Renewable resource (or material)	A resource that is grown, naturally replenished, or cleansed at a rate which exceeds depletion of the usable supply of that resource. (i.e. cotton, hemp, wood, wool, agricultural by-products, etc.).	ASTM E2129-05 / 2005
Single-use plastic product	A product that is made wholly or partly from plastic and that is not conceived, designed or placed on the market to accomplish, within its life span, multiple trips or rotations by being returned to a producer for refill or re-used for the same purpose for which it was conceived.	Directive (EU) 2019/904
Sustainable development	Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.	Brundtland report, 1987
Virgin material	Materials that have not yet been used in the economy.	The Ellen Macarthur Foundation
Waste	Anything for which the generator or holder has no further use and which is discarded or is released to the environment.	ISO 14021:2016
Waste reduction	Reduction in the quantity (mass) of material entering the waste stream as a result of a change in the goods, process or packaging.	ISO 14021:2016

GLOSSARY:	EXPLANATION:	SOURCE:
Aluminium slag (bottom ash)	The incombustible residual part of the incinerated waste. Slagger or bottom ash is composed of inert, non-combustible materials that are left over after the combustion process: Sand, stones, ash from burnt material.	https://www.cewep.eu/wp-content/uploads/2017/09/FINAL-Bottom-Ash-factsheet.pdf
Biodegradable plastic	A plastic capable of undergoing physical, biological decomposition, such that it ultimately decomposes into carbon dioxide (CO ₂), biomass and water, and is, in accordance with European standards for packaging, recoverable through composting and anaerobic digestion.	Directive (EU) 2019/904
Chemical recycling	Chemical Recycling is defined as any reprocessing technology that directly affects either the formulation of the polymeric waste or the polymer itself and converts them into chemical substances and/or products whether for the original or other purposes, excluding energy recovery.	https://www.chemicalrecycling-europe.eu/copy-of-about-chemical-recycling-1
Closed-loop system	In a closed-loop recycling system, packaging is designed with the goal that all of the material can be recycled into the same type of product after it reaches the end user.	https://www.producebluebook.com/2020/01/03/explaining-closed-loop-vs-open-loop-recycling/#
Compostable	A packaging or packaging component is compostable if it is in compliance with relevant international compostability standards and if its successful post-consumer collection, (sorting), and composting is proven to work in practice and at scale.	NEW PLASTICS ECONOMY GLOBAL COMMITMENT
Downcycling	To recycle (something) in such a way that the resulting product is of a lower value than the original item.	www.merriam-webster.com
Easy-to-recycle	Easy-to-recycle means that a packaging is designed to be recycled. The packaging is made of mono-material and in colors that are detectable by NIR (the most common way of sorting) as well as demanded on the market.	The Danish Plastics Federation
Incineration	Is the high-temperature burning (rapid oxidation) of a waste.	https://www.sciencedirect.com/topics/chemistry/incineration
Landfill	Landfills are delimited constructions where waste can be landfilled under controlled and environmentally sound conditions. Before being landfilled the waste must have been inspected and checked.	https://www2.mst.dk/udgiv/publications/2000/87-7909-605-0/html/kap03_eng.htm
Mechanical recycling	Mechanical recycling refers to operations that aim to recover plastics via mechanical processes (grinding, washing, separating, drying, re-granulating and compounding), thus producing recyclates that can be converted into plastics products, substituting virgin plastics.	https://docs.european-bioplastics.org/publications/bp/EUBP_BP_Mechanical_recycling.pdf
Oxo-degradable plastic	Plastic materials that include additives which, through oxidation, lead to the fragmentation of the plastic material into micro-fragments or to chemical decomposition.	Directive (EU) 2019/904
Post-consumer recycled content	Material generated by households or by commercial, industrial and institutional facilities in their role as end users of the product which can no longer be used for its intended purpose. This includes returns of material from the distribution chain.	(ISO 14021:2016)
Post-industrial recycled content	Material diverted from the waste stream during a manufacturing process.	ISO 14021:2016
Recyclable packaging	A packaging or packaging component is recyclable if its successful post-consumer collection, sorting, and recycling is proven to work in practice and at scale.	New plastics economy global commitment
Recycled content	Proportion, by mass, of recycled material in a product or packaging. Only pre-consumer and post-consumer materials shall be considered as recycled content, consistent with the following usage of terms.	ISO 14021:2016
Recycling	Waste materials are processed into new products or materials.	European Plastics Pact
Reusable	A characteristic of goods or packaging that has been conceived and designed to accomplish within its life cycle a certain number of trips, rotations or uses for the same purpose for which it was conceived.	ISO 14021:2016
Reuse of packaging	Operation by which packaging is refilled or used for the same purpose for which it was conceived, with or without the support of auxiliary products (1) present on the market, enabling the packaging to be refilled.	ISO 18603:2013 Packaging and the environment - Reuse
Recycled aluminium	It is a part of the secondary aluminum process of recycling aluminum scrap into aluminum that can be used again.	https://www.recyclealuminum.org/recycled-secondary-aluminum

MATERIAL	NAME	MONO-MATERIAL	CAN CONTAIN RECYCLED MATERIAL	EASY-TO-RECYCLE	CLEAR	COLORED	FREEZER	MICROWAVE	OVEN	GRILL
	APET	Amorphous PET	✓	✓	✓	✓	✓			
	CPET	Crystalline PET	✓	✓	✓	✓	✓	✓	✓ (max 220°C)	
	DPET	Direct-to-sheet	✓		✓	✓	✓			
	rPET	Recycled Amorphous PET	✓	✓	✓	✓	✓			
	PP	Polypropylene	✓	✓	✓	✓	✓	✓		
	PP Chalk	Polypropylene w/chalk		✓ (black only)		✓	✓	✓		
	OPS	Oriented polystyrene	✓		✓	✓	✓			
	HIPS	High impact polystyrene	✓			✓	✓			
	Aluminium	Aluminium	✓	✓		✓	✓	✓	✓	✓ (not if lacquered)
